📁 Portfolio | LeetCode

CAREER OBJECTIVE

Aspiring Software Engineer with strong foundations in Java, Data Structures and Algorithms, and Full Stack Development. Passionate about building scalable software, solving real-world problems, and continuously learning modern technologies.

EDUCATION

B.Tech – CSE (Artificial Intelligence) <i>Vignan's Institute of Information and Technology</i>	2024–2027 CGPA: 9.06
Diploma – Computer Engineering <i>Government Polytechnic College, Srikakulam</i>	2021–2024 Percentage: 86.92
SSC <i>A.V.N. M.C.H High School</i>	2020–2021 CGPA: 10.0

INTERNSHIPS

Google Student Ambassador <i>Google for Developers (Gemini Program)</i> - Organized AI and Google Gemini workshops, promoting Generative AI, cloud technologies, and developer tools among students. - Strengthened campus technical communities through mentoring, technical events, and knowledge-sharing initiatives.	Jul 2025 – Dec 2025
Web Development Intern <i>Nlite Asia Pvt. Ltd.</i> - Developed responsive web applications using Python and Django (MVT), implementing backend features and database integration. - Collaborated in an Agile environment and completed the internship with .	Nov 2023 – Apr 2024
Web Development Intern <i>Vault of Codes</i> - Developed websites and optimized responsive user interfaces for improved performance. - Enhanced cross-browser compatibility by following modern frontend development best practices.	Jun 2025 – Jul 2025
Java Full Stack Developer Trainee <i>Eduskills (APSCHE)</i> Completed hands-on training in Java, OOP, Data Structures, SQL, JavaScript, and Full Stack Development through project-based learning.	Oct 2024 – Dec 2024

PROJECTS

FitAura – Health & Wellness Platform <i>Python, Flask, Tailwind CSS, SQLite</i> Built a full-stack health management platform featuring BMI Calculator, Diet Planner, Workout Tracker, Pomodoro Timer, and AI chatbot.
CardioPredict – AI Heart Disease Prediction System <i>Python, Flask, Scikit-learn, Gemini API</i> - Developed a machine learning web application using Random Forest for heart disease prediction with real-time risk analysis. - Integrated Google Gemini API to provide personalized health recommendations based on prediction results.
EduSpark – AI-Powered Personalized Learning Platform <i>Python, Streamlit, Gemini API</i> Developed an AI-powered personalized learning platform using Streamlit and Google Gemini API for intelligent tutoring, quiz generation, and doubt resolution.
Self-Driven Car Prototype <i>Arduino UNO, C, Ultrasonic & IR Sensors</i> - Designed and programmed an autonomous robotic vehicle with real-time obstacle detection and navigation. - Implemented embedded C motor control logic for efficient hardware–software integration.
Gesture Vox: Gesture-to-Speech Glove <i>Arduino UNO, C++, Flex Sensors, MPU6050, TTS</i> Developed a smart wearable glove using flex sensors and an MPU6050 motion sensor to convert sign language gestures into text and speech through embedded C++ programming, enabling communication for deaf and speech-impaired individuals.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, C, SQL
Frontend: HTML, CSS, React.js, Tailwind CSS
Backend: Flask, Django, FastAPI, Node.js
Databases: SQLite, Firebase Realtime Database
Developer Tools: Git, GitHub, VS Code, Arduino IDE, Google Colab

CERTIFICATIONS & LEADERSHIP

- Certifications:** Python with Django (Nlite Asia) | Java Full Stack (Eduskills) | Python Essentials 1 & 2 (Cisco) | Introduction to Modern AI (Cisco) | JavaScript (PupilFirst)
- Leadership:** Google Student Ambassador | Startup Community Lead – NEC Core Team | Student Coordinator – Entrepreneurship Development Cell (EDC)
